# WALK-IN COOLERS AND FREEZERS

Convenience Stores

## Walk-in coolers and freezers for any convenience store application

### OVER 50 YEARS OF INNOVATION

With over 50 years experience with walk-in cold storage, we enjoy an unrivalled reputation for product quality, making us the supplier of choice throughout food retailing.

### CUSTOMER FOCUSED SERVICE

From order inquiry, through quotation, design, manufacture and installation, our skilled and highly trained sales and engineering teams are available to provide expert advice, ensuring seamless management of your cold storage project. CrownTonka has distribution points based at six convenient locations, backed by a national installation and service network, providing only the best equipment, parts and after sales support to our customers.

### BUILT TO YOUR EXACT SPECIFICATIONS

Because everyone's needs and preferences are different, our walk-ins are engineered and built to your exact dimensions and specifications. Flexible design, modular and unitized one-piece construction techniques ensure that we deliver walk-ins, which meet your exact requirements, helping you maximize operational efficiency and sell more refrigerated products.

### COLD STORAGE VERSATILITY

We manufacture walk-ins for indoor or outdoor applications, helping you make the most of available floor space. Walk-ins may be supplied as coolers, freezers or combos for ultimate versatility in temperature controlled storage. Our coolers are the ideal solution for the storage and display of chilled beer, soda and sports drinks.

### CLASSIFICATIONS & APPROVALS\*

CrownTonka walk-in panels and ICS one-piece walk-ins are approved under numerous classifications and approvals, providing our customers with total peace of mind over potentially costly delays associated with national and local regulatory requirements. Approvals include all or some of the following:

- \* EISA Compliant
- \* NSF Certified
- \* U.L. Class 1 listed urethane foam insulation
- \* FM 4880 Approved (PN#613)  
(Does not apply to one-piece walk-ins)
- \* USDA Approved Materials
- \* UL Electrical
- \* State of New York, MEA
- \* California Bureau of Home Furnishing and Thermal Insulation
- \* State of Oregon
- \* City of Los Angeles
- \* CAN/ULC-S102 Surface Burning Characteristics of Building Materials and Assemblies
- \* Wisconsin (DHILR)
- \* City of Houston
- \* California Energy Code Compliant
- \* UL Listed Door Panel Assembly
- \* UL Classified Building Unit

In addition to some of the above approvals, the one-piece walk-ins have:

- \* Florida Building Code for Manufactured Buildings Program # MFT-9754
- \* CUL and CSA
- \* UL Listed Commercial Walk-In unit
- \* Industrialized Building Commission
- \* State of Ohio Industrialized Unit
- \* State of Indiana Industrialized Building Systems

*\*CrownTonka panels and ICS one-piece walk-ins are manufactured to meet most national and local codes. It is incumbent upon the customer to consult with local inspectors and their Customer Service Representative to insure compliance.*

### FEATURES & OPTIONS SUPERIOR INSULATION & STRUCTURAL RIGIDITY

All CrownTonka walk-in panels are manufactured in non-HCFC ENVIROFOAM™, environmentally sensitive urethane foam, with a choice of 3.5", 4", 5" or 6" panel thicknesses for high efficiency insulating properties, significantly reducing energy consumption and running costs.

All panels have tongue and groove construction, with gasket applied to all joints, forming an airtight seal. CrownTonka walk-ins feature wood or high density foam rail, with metal facing and foam in place bonding, together with cam lock panel fastening for structural rigidity and ease of installation.

### FINISHES

As standard, internal and external finish is 26 gauge embossed galvanized steel, which may be supplied with a white, black or almond paint finish, or alternative colors to order.

A wide range of optional finishes is available, including .032 embossed aluminum, .040 smooth white aluminum, .040 embossed aluminum, Acrylume, 22 gauge type 304 stainless steel

#4 finish, 430 rolled-on stainless steel, embossed stainless steel and antimicrobial Sanisteel. Our one-piece walk-ins may be supplied with a range of brick and stone effect finishes to meet municipality requirements.

### ONE PIECE WALK-INS

- \* Cost effective alternative to panel or bricks and mortar construction
- \* Coolers, freezers and combos
- \* Suitable for outdoor or indoor applications
- \* Seamless construction in non CFC urethane foam
- \* Factory build and testing eliminates on site assembly costs
- \* Interiors customized to specific applications
- \* Multiple finish options
- \* Fast track installation – typically in 3-5 hours

### DOORS

As standard, CrownTonka walk-ins are supplied with in-fitting overlap self closing swing doors.

Standard features include:

- \* High quality, heavy duty hardware with safety release
- \* Magnetic door gasket and door bottoms
- \* Pre-hung for doors up to 48"
- \* Heated jamb and door bottom sweep assembly on freezer models
- \* Threshold plates for cooler or freezer

To help maximize the use of available space and provide ease of access and egress, a wide range of optional door systems is also available.

- \* Glass display doors
- \* Single slide manual doors
- \* Single slide power doors
- \* Bi-part manual doors
- \* Bi-part power doors
- \* Reach-in service doors
- \* Outside security doors
