

Are you losing valuable floor space with indoor cold storage?

Before - indoor cold storage

In quick service restaurants, floor space equals profit dollars. If you are tying up precious indoor operational floor space with walk-in cold storage, you are reducing your seating capacity, which means less sales and reduced profit. You are also compromising the size of your kitchen and service stations, which means reduced foodservice capacity and slower service.

Turn the page to find out how you can increase your operational floor space for increased sales and maximum profit.

ICS one piece walk-ins - making the most of outdoor space

ICS one piece walk-ins are designed for outdoor locations with convenient thru-the-wall access. By locating your cold storage outdoors you free up valuable operational indoor floor space for:

- Additional seating capacity for increased sales and maximum profit
- Larger kitchen for a broader menu and greater foodservice capacity
- More service stations for quicker service

ICS one piece outdoor walk-ins are a convenient alternative to traditional bricks and mortar construction, reducing your \$/sq ft costs for both new construction and remodel applications.
