

# One-Piece Exterior Walk-In

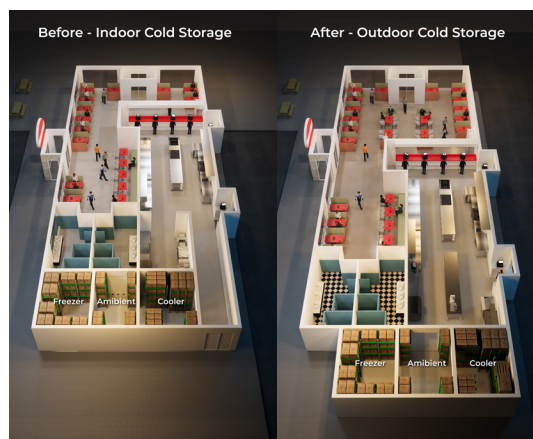

Pre-assembled,  
Ready to Operate

## Space-Saving & Cost-Effective Solutions with ICS Walk-Ins

ICS one-piece walk-ins offer significant savings by relocating storage outdoors, reducing construction costs by approximately \$525 per square foot. Moving a 20' x 10' walk-in outdoors can save \$105,000. This approach frees up valuable indoor space for more profitable space utilization.

Engineered for seamless one-piece construction, ICS walk-ins ensure optimal temperature control and energy efficiency with factory-installed and tested refrigeration and electrical components. They arrive pre-assembled and ready for use within 2-4 hours, eliminating the need for excessive trades. An electrician can simply connect the power, and a General Contractor can handle any necessary flashing.

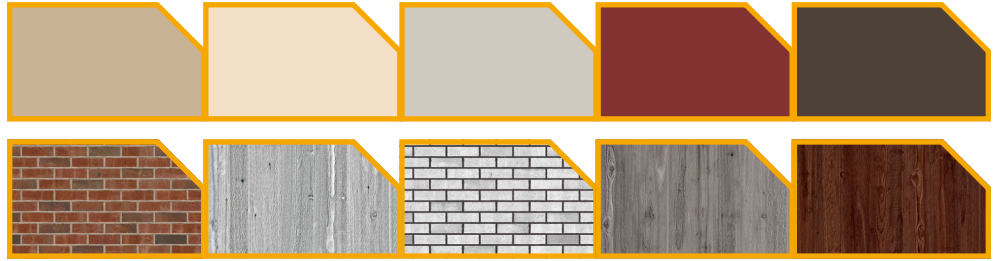

### Ideal Solution for:

**Cooler, Freezer, Ambient,  
Combo Applications**

- Restaurant (QSRs & Full-Service) - Including Drive-Thru Expansion
- Schools & Universities
- Grocery Stores - Including Curbside Pick-Up Stations
- Convenience Stores
- Healthcare
- Food Pantries / Banks
- Institutional Foodservice
- Environmental Chambers
- Distribution
- Modular Offices or Storage
- Correctional Facilities
- Mobile Trailer Storage
- Agriculture

## Match Existing Exterior

ICS walk-ins feature advanced 4K Metal Finish technology, matching your building's exterior seamlessly for long-lasting durability and a sleek design. Suitable for new builds, remodels, or free-standing satellite storage, ICS walk-ins maximize indoor space and offer significant cost savings compared to indoor storage.
